    }
}
return 0;
}

```

The screenshot shows a C++ IDE with a code editor on the left and a console window on the right. The code editor displays a menu-driven program for student management. The console window shows the program's execution, including menu selections, input for student details, and the resulting student list.

Code Editor (HW_07_11.c):

```

221     else if (sort == 3)
222     {
223         save_studen
224     }
225     else if (sort == 4)
226     {
227         load_studen
228     }
229     else if (sort == 5)
230     {
231         for (int i
232         {
233             free(st
234         }
235         break;
236     }
237 }
238 return 0;
239 }

```

Console Output:

```

기능 선택 : (1 : 학생 정렬)(2 : 학생 찾기)(3 : 학생 추가)(4 : 학생 삭제)(5 : 출석부 저장)(6 : 출석부 불러오기)(7 : 종료)
